3. Quarters Required as of 1 July 1952

A total of 10 rooms will be required for D/S personnel assigned to the all source material area and 9 rooms in the collateral area. It is not known how many persons will be assigned to work with the branches and analysts of D/S in the all source material area, but it is probable that the combined staffs can be accommodated in the quarters originally assigned and now largely occupied by D/S in Corridor 2. One room should be made available for meeting outside contacts. This is especially important because 3 branches are intimately associated with the work of EIC subcommittees.

No provision is made for additions to the staff subsequent to 1 July 1952, but it is not probable that the increase in the latter half of the calendar year will exceed 6 persons.
